

BEHRAD ZABIHI

DATA SCIENTIST / AI ENGINEER

Manchester, UK | Eligible to work in the UK without sponsorship

behradz.work@gmail.com | LinkedIn | GitHub | Portfolio

PROFILE

Data Scientist and AI Engineer with 4+ years of experience building production machine learning, data and AI systems. Strongest where modelling meets real delivery: data preparation, evaluation, cloud architecture, deployment and monitoring. Professional experience spans GCP feature platforms, multimodal document AI on AWS, NLP, RAG and high-volume data pipelines; recent portfolio work covers agentic products, LLM fine-tuning and multi-agent systems.

EXPERIENCE

Data Scientist

Bet365

Feb 2026 - Present

Manchester, UK

- Engineered 700+ ML-ready player profiling features across gaming preferences and behavioural patterns for more than 1M UK players using SQL Server and Python.
- Productionised an end-to-end GCP feature pipeline with daily BigQuery incremental recompute and Vertex AI Feature Store serving at 10ms latency for downstream ML models.

TOOLS Python, SQL Server, GCP, BigQuery, Vertex AI Feature Store

Data Scientist

Informed Solutions

Nov 2023 - Nov 2025

Manchester, UK

- Built a multimodal AWS validation pipeline with Llama, LLaVA, Bedrock and Textract, reducing a two-week review process to real time at 0.91 F1.
- Developed a prompt-engineered RAG workflow to match new applications against relevant historical cases.
- Built an Airbyte and dbt pipeline linking EPC and postcode data for 65,000 households, powering household-level insights.
- Built Power BI decision-support dashboards and communicated complex AI and ML concepts to technical and non-technical stakeholders.

TOOLS AWS, Bedrock, Textract, Llama, LLaVA, RAG, Airbyte, dbt, Power BI

Data Science Placement

Informed Solutions

Jun 2023 - Sep 2023

Manchester, UK

- Built NLP pipelines for keyword extraction, BERTopic-based topic modelling and summarisation across structured and unstructured documents.
- Used LangChain to summarise planning cases, cutting review time by 60% and reaching BERTScore F1 of 0.84.

TOOLS Python, NLP, BERTopic, LangChain, LLMs

Data Scientist

Mizan Gostaran Sharif

Jun 2022 - Aug 2022

Tehran, Iran

- Scaled a resume parsing system from 26K to more than 500K CVs using a custom NLP entity-extraction pipeline.
- Improved job recommendation by clustering CVs with UMAP and HDBSCAN for semantic similarity analysis.

TOOLS Python, NLP, UMAP, HDBSCAN

ML Research Assistant

Sharif University of Technology

Feb 2021 - Jul 2021

Tehran, Iran

- Modelled Covid-19 propagation using time-series and statistical modelling across 100K global cases.
- Identified influential nodes in a global transmission graph by inferring inter-country transmission rates.

TOOLS Python, Time Series, Statistics, Graph Analysis

SELECTED AI & DATA PROJECTS

Alex Financial Advisor

Production-style agentic AI

End-to-end AI financial planning application with authenticated users, FastAPI Lambda backend, Aurora PostgreSQL, SQS jobs, retrieval-backed context and Planner, Tagger, Reporter, Charter and Retirement agents.

TOOLS Next.js, FastAPI, AWS, Aurora, SQS, SageMaker, S3 Vectors, Terraform

Generative AI Price Prediction

400K+ products | \$54.7 mean error | 0.40 RMSLE

Fine-tuned Llama 3.1 8B with QLoRA for product price prediction and evaluated the result against frontier-model baselines on the project's stated benchmark.

TOOLS Llama 3.1, QLoRA, PyTorch, Hugging Face, BitsAndBytes

AI Digital Twin

Grounded personal AI | Serverless deployment

Built a conversational portfolio layer over curated professional context with prompt design, hallucination boundaries, session memory and AWS serverless infrastructure.

TOOLS Bedrock, FastAPI, Lambda, API Gateway, S3, CloudFront, Terraform

Trading Floor

MCP tools | Agent orchestration | Market context

Created an agentic trading simulation and AI engineering team using tool calls, specialist roles, account state, market data and multiple model providers.

TOOLS OpenAI SDK, CrewAI, MCP, Python

TECHNICAL SKILLS

AI & ML	Machine learning, deep learning, NLP, RAG, LLM engineering, QLoRA, agentic AI, multi-agent systems, time series, statistics
Data	Python, SQL, BigQuery, SQL Server, dbt, Airbyte, Apache NiFi, PostgreSQL, Power BI, Grafana
Cloud	AWS, GCP, Azure, Bedrock, Vertex AI, SageMaker, Lambda, S3, SQS, Docker, Terraform, CI/CD
Engineering	FastAPI, Next.js, React, TypeScript, Django, REST APIs, Git, testing, MCP, LangChain

EDUCATION & RECOGNITION

MSc Data Science and Statistics	2022 - 2023
Lancaster University, UK	Distinction Top 2.5%
BSc Computer Engineering	2016 - 2021
Sharif University of Technology, Iran	Gold Medalist, National Olympiad in Informatics

ADDITIONAL DEVELOPMENT

Completed Ed Donner's six-course practical AI curriculum covering LLM engineering, RAG, QLoRA, coding agents, agentic systems, MCP, AI strategy and production deployment.
